

Morgan Anunda

Baltimore, MD | (667) 487-4013 | manunda1@jh.edu | LinkedIn | GitHub

EDUCATION

****Johns Hopkins University**** — Baltimore, MD

Bachelor of Science in Computer Science

August 2025 – May 2029

- Relevant Coursework: Causal Inference, Gateway Computing: Python, Visual Cognition
- Activities: Brain-Computer Interface Society, Taekwondo, Wall Street Internship Academy, NSBE (Freshman Representative), Black Male Initiative Scholar

EXPERIENCE

****Self-Tutelage**** — Kenya

Machine Learning / Data Science / Neuroscience

November 2023 – Present

- Applied Python to execute machine learning workflows across 5+ projects
- Predicted stroke risk using patient data, achieving 87% recall
- Developed models for house price prediction and image classification using CNN with ~73% accuracy
- Simulated neuron spike activity using the Leaky Integrate-and-Fire model

****AssistiveMath**** — Nairobi, Kenya

Applied ML/AI Intern

June 2025 – August 2025

- Enhanced accessibility in math education for visually impaired learners by integrating large language models (LLMs) and computer vision (CV) techniques
- Reduced computer vision module setup time by 90% via integration of scikit-image's Structural Similarity Index (SSIM) for frame-level analysis
- Improved reliability and scalability of YouTube video metadata ingestion and ETL pipelines in Azure, processing 1,000+ records with 99.9% job success rate
- Developed and deployed a 4-stage asynchronous FastAPI pipeline with real-time progress updates, supporting concurrent conversions in a B-Corp-aligned environment

****Building-U**** — NL, Canada

Data and Marketing Analyst

April 2024 – June 2024

- Analyzed and visualized advertising campaign data to optimize bids within a \$10K/month budget
- Monitored keyword performance and delivered weekly reports to the Director of

Growth

****Kapsabet High School**** — Kapsabet, Kenya

Web Developer

January 2023 – July 2023

- Co-developed and designed the school website using WordPress, HTML, and CSS

PROJECTS

****Menace: Reinforcement Learning with Tic-Tac-Toe**** — Nairobi, Kenya

OOP, Game AI

July 2025 – September 2025

- Designed a Tic-Tac-Toe game engine and self-learning AI based on Donald Michie's MENACE algorithm (1960s) using Python
- Implemented a reinforcement learning algorithm from scratch, modeling game states and bead-based learning with Python data structures
- Created 5 unit tests using Python's unittest framework to validate game logic, win/loss conditions, and AI learning mechanisms

LEADERSHIP

****For A Smile's Sake**** — Kenya

Advisory Board Member

August 2024 – Present

- Provide strategic advice on philanthropy and youth empowerment programs benefiting 2,000+ individuals
- Led the launch of a high school chapter and volunteer network across 7 regions in Kenya, Uganda, and the Diaspora, supporting health, education, and resource mobilization initiatives

TECHNICAL SKILLS

****Languages:**** Python, Java, C, C++, JavaScript, SQL, HTML, CSS, Vue.js

****Tools & Libraries:**** Git, GitHub, Azure, VS Code, Google Colab, Excel, pandas, NumPy, Matplotlib, PyTorch, TensorFlow
